

## ENVIRONMENTAL POLICY

TASK Engineering Pty Limited recognises that construction sites contribute a number of hazards to the environment, including water, air and noise pollution and will take every care to minimise these hazards.

Our policy is to carry out all work in a way that will minimise damage to the environment. Our damage is already limited by the fact that contract sites are limited to areas where major infrastructure has already impacted heavily on the environment. The final step of traffic signals installation does not introduce any new major environmental issues.

TASK Engineering Pty Limited acknowledges that they are responsible for

- ✓ Have an Environmental management system based on the requirements of the most current version of RTA specification G35.
- ✓ Controlling Soil Erosion at excavations – Stormwater runoff
- ✓ Controlling Slurry – Stormwater runoff
- ✓ Dust contamination from excavations
- ✓ Protecting landscaped vegetation as part of decorative garden features.
- ✓ Preventing damage to existing trees, plants and other vegetation as part of road/council reserve.

The Managing Director shall make employees and subcontractors aware of these responsibilities via an induction process.

A system of Hazard Identification and Risk Assessment shall be utilised to ensure all environmental aspects of the company's business are identified, assessed and controlled.
