

QUALITY POLICY

TASK Engineering Pty Ltd is a contracting Company that specialises in the installation of vehicular traffic signals and associated systems. TASK aims to achieve this by complying with all legislative and other requirements as documented on our Integrated Quality, Safety and Environmental Management System. Where legislative instruments do not apply, Task Engineering will implement 'best practice' procedures. In particular Task Engineering will:

- ✓ Issue the policy to clearly indicate the attitude of the Company to quality since such actions are essential for the long-term success of TASK Engineering Pty Ltd as well as our competitive position and reputation.
- ✓ Have register quality management system based on the requirements of AS/NZS ISO 9001:2000. The system has been established and implemented to systematically plan and control all aspects of the work including safety and environmental protection.
- ✓ Have objectives to meet the requirements of the contract and the customer's technical specifications, and to the plan and complete the Works in an efficient and timely manner so as to give our customers confidence in the capabilities of the Company.

To achieve this, TASK Engineering Pty Ltd will measure both the company's performance and our customer's satisfaction to provide objective evidence that the contract requirements have been met. It is management's aim to monitor and analyze relevant records and, by implementing any changes found necessary, to continually improve the company's performance.
